

Prinoth Trooper™ Tracked Carrier vehicle

The trooper is an excellent means of transportation around a worksite in any weather and across any terrain. It can handle steep slopes with ease. With low (.85 psi) ground pressure, the Prinoth Trooper can easily cross remote right-of-ways.

This vehicle can be used for transmission line maintenance and for construction crew access to remote work sites. With a four-person cab, the Trooper will get the crew to their destination safely and efficiently.
